

CHIP COLLINS MAGLASANG

FRONTEND & FULL-STACK DEVELOPER

Yati Liloan, Cebu | collinsgt12374@gmail.com | <https://chipcollinsmaglasang.vercel.app/> | 09398975547

PROGRAMMING LANGUAGE

HTML	JavaScript	C++
CSS	C	Python

TECH SKILLS

- **Frontend Development** - HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React, Next.js, Responsive Design & UI/UX
- **Backend Development** - Python, FastAPI, Node.js, RESTful API, Database Management, SQL, Supabase
- **Mobile Application Development** - React Native, TypeScript, JavaScript, Expo
- **Tools & Technologies** - Vite, Twilio (Voice & SMS APIs), Supabase, Serper, NGROK, Github, Github Desktop, Machine Learning using Python

INTERNSHIP EXPERIENCE

Frontend Developer June - August 2025

Right Apps Inc.

- Developed reusable frontend components using Next.js to support scalable and maintainable web application development.
- Implemented responsive layouts and consistent UI structures to ensure compatibility across different screen sizes and devices.
- Collaborated with the development and design team to translate UI/UX designs into functional frontend interfaces with accurate visual implementation.

AI Developer / FullStack Development February - April 2026

OneTouch Networks

- Developed intelligent AI voice agents using the OpenAI Agents SDK and advanced Large Language Models (LLMs) to deliver natural, context-aware, and human-like conversational experiences for automation systems.
- Integrated real-time communication workflows and backend services to process user inputs, manage conversational context, and generate accurate AI-driven responses for voice-based interactions.
- Architected full-stack functionalities that connected frontend interfaces, backend APIs, and AI services to support seamless end-to-end conversational automation systems.
- Optimized conversational logic, prompt structures, and response handling mechanisms to improve AI accuracy, response consistency, and overall interaction quality.

EDUCATION

Bachelor of Science in Computer Engineering 2022 - Present

Cebu Technological University - Danao Campus

Senior High School – (STEM) Strand 2020 - 2022

University of Cebu Senior High School - Banilad Campus

PROJECTS

Evergreen - IoT Avocado Freshness Detection System (Capstone Project)

- Developed an IoT-based fruit freshness detection system integrating sensors, Bluetooth, mobile app, and Python-based machine learning to collect and analyze real-time data from hardware devices. Built a user-friendly dashboard to display live sensor readings and predictive analytics, including fruit freshness classification and remaining shelf-life estimation from processed sensor data.
